SUBJECT: Briefing on South African Nuclear Developments for
NSC Staffers

The subject briefing for Staffers Guhin and Wettering will take place in Guhin's office (Room 365, EOB) at 1100 hours on Thursday, 18 February. As we'd discussed this morning, in the course of a half hour or so we should cover a) the essentials of the program--nuclear power industry developments (including fuel fabrication story) and new indications of weapons-related work [redacted] and b) a projection of policies including those pertaining to the NPT and safeguards acceptance [redacted]. I will provide an introductory overview. [redacted] (ANIO/WE) informs me that Wettering will want some of the basics about the program. We should also plan to use the occasion to discuss approaches to be taken in the preparation of the scheduled IIM on South Africa's nuclear security programs and policies.
